

## Press Release

### Schaufler Fischer Group and Koide Announce Strategic Partnership to Advance High-Pressure Diecasting Technology

July 5, 2024 – Iwata-shi, Japan

SF Tooling Group GmbH (Schaufler Fischer Group) and Koide Co., Ltd. (Koide) are pleased to announce the signing of a strategic cooperation agreement aimed at enhancing high-pressure diecasting technology and services. This partnership unites two industry leaders to provide innovative solutions for Mega- and Giga-casting applications.

#### Partnership Overview

Schaufler Fischer Group, a global leader in large high-pressure diecasting dies, and Koide, a top toolmaker in Japan, will collaborate to win new Mega- / Giga die business from Japanese OEMs. Schaufler Fischer Group will leverage Koide's local expertise and services to offer comprehensive support to their clients in Japan.

#### Mutual Commitments

Koide will invest in Mega- / Giga die capabilities, introduce Schaufler Fischer Group to its primary market and offer die-related services for Schaufler Fischer Group projects in Japan. Schaufler Fischer Group will assist Koide in providing service to their customers in the European and North American market.

#### Shared Vision

This partnership is built on a mutual commitment to innovation and excellence. By combining their strengths, Schaufler Fischer Group and Koide aim to set new standards in diecasting technology, ensuring their customers receive the highest quality products and services.

#### Statements from Leadership

“We are excited to partner with Koide, enabling us to better serve our customers in Japan with local support and innovative solutions,” said Siegfried Heinrich, CEO of Schaufler Fischer Group.

Satoru Koide, President of Koide, added, “This collaboration with Schaufler Fischer Group enhances our capabilities and opens new opportunities for growth and development.”

## Looking Ahead

Both companies are committed to maintaining high standards of confidentiality and intellectual property protection while supporting each other to respond effectively to market needs. This strategic cooperation agreement represents a significant step forward in advancing high-pressure diecasting technology.
